

Trauma Professionals Update

October 2024

Patient Care

Wise tree stand use and injury treatment

Individuals must know how to stay safe when using tree stands while hunting. If a patient with a tree stand injury presents at your trauma center, see these tips for immediate care.

New devices improve trauma care

A second-generation supraglottic airway device helps quickly secure an injured patient's airway if intubation isn't possible. A video laryngoscopy provides a visual recording of all intubation attempts, facilitating continuous improvement.

Hunting gunshot injury prevention and treatment

Unintentional injuries may occur when hunting with firearms. In a Q&A, Mayo Clinic Trauma Center adult medical director talks about his experiences and how to help at the scene or at your trauma center.
